important information about laminate floors

Laminate flooring is a beautiful reproduction of wood or stone and therefore variations in colour, tone and graining are to be expected. Please note that the display samples may not always be a true representation of the final product. For this reason, new and/or replacement flooring may not exactly match display samples and/or existing flooring. See krausflooring.com for latest specifications. Product image colours may vary due to print processes and monitor display settings. Product image colours may vary due to print processes and monitor display settings.
