## important information about laminate floors

Laminate flooring is a beautiful reproduction of wood or stone and therefore variations in colour, tone and graining are to be expected. Please note that the display samples may not always be a true representation of the final product. For this reason, new and/or replacement flooring may not exactly match display samples and/or existing flooring. See [krausflooring.com](http://krausflooring.com) for latest specifications. Product image colours may vary due to print processes and monitor display settings.
